20% of the visitors are interested in the topics of the conference programme

26TH INTERNATIONAL EXHIBITION

NEFTEGAZ

EQUIPMENT AND TECHNOLOGIES FOR THE OIL AND GAS INDUSTRY

Crocus Expo, Moscow, Russia

What our exhibitors say

Andrey Ulyanov,
Director General, RegLab

"We are a leading Russian developer and manufacturer of electronic equipment designed to control complex technical processes. We announced one of the most important products for our market at the show. It is a distributed external management system. This is entirely our development.

We have managed to sign four interesting and important agreements for our business on the use of Russian chips in our equipment.

Neftegaz is a key event for our business. We are happy to be partners here every year. And we will keep going on and on and on."

Sergey Kayatkin,
Chair at the Board of Directors, EMIS

"On behalf of EMIS, we would like to welcome all our colleagues, partners, customers, and the entire professional community to Neftegaz. We have brought new products here to share what we have developed, what we have just started selling. At the same time, we are eager to see our colleagues.

In general, the show is very interesting, especially today it is very productive. Look at how many people are here. This show takes place at this venue for the first time. The management is at a very good level.

We are very pleased to come to this show every year. Being here is a great honour and a necessity for everyone who works in the oil and gas industry."

Dmitry Myagkiy,
Head of the Sales Department, Rizur

"We are glad to welcome all participants, our partners and friends at Neftegaz 2026. This year it takes place at Crocus Expo.

This year we have booked the largest stand in our history. We brought the maximum amount of equipment and introduced our new products to the market.

We are already seeing an increase in the flow of equipment. Clients come from all over our country. We have already held a meeting with people from the Far East.

The management of the show exceeded our expectations. Rizur is 30 years old this year. 80% of our key clients are always present here or trying to attend this event."

Viktor Erchenko,
Deputy Director General for International Sales Development, Fidmash

"Our equipment is unique. To date, there are no more than four copies of such equipment in Russia. Three of them are made by us.

Customers just do not leave our stand. We had many good meetings with both Russian and foreign clients. There were representatives from India and the Middle East.

That is why trade shows exist, so that people can show their own products, see what others are producing, and understand what the trends are today."
